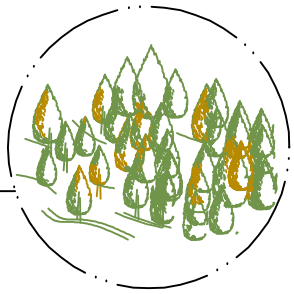
The Project's Concept

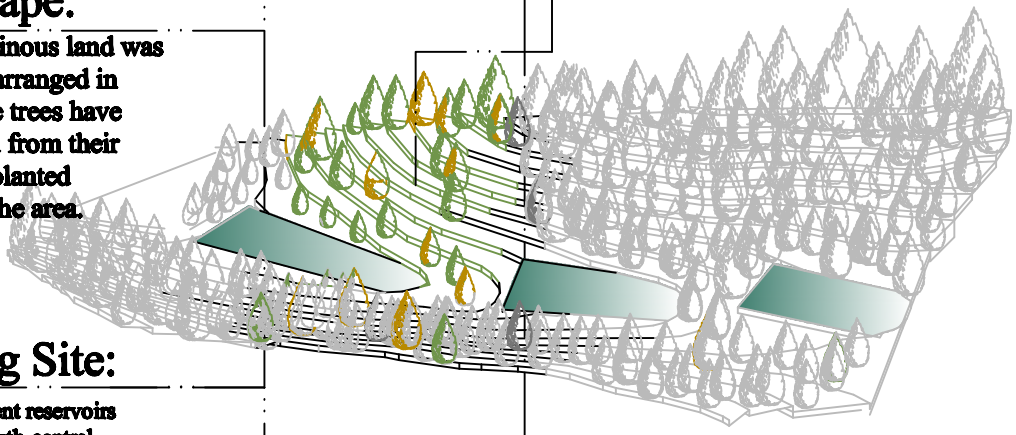
Architecture:

The land is characterized by natural and archaeological,The project designed to be consistent with the distinctive nature.
In term of architecture there were two options: abuilding simulation or building contrary.
The design of the project is modern style using curved lines.



Landscape:

The mountainous land was trimmed and arranged in terraces, some trees have been removed from their places and replanted elsewhere in the area.



Existing Site:

Are three ancient reservoirs located in the south-central West Bank, immediately to the south of the Palestinian village of al-Khader, about 5 kilometres (3.1 mi) southwest of Bethlehem and near the road to Hebron.
