

Table of content

الأهداء.....	III
Acknowledgments.....	V
Abstract.....	VI
ملخص.....	VII
List of figures.....	XVI
List of tables.....	XVII
Abbreviations	XVIII

Chapter one: Introduction.....1

1.1Overview.....	2
1.2 Project Objectives.....	2
1.3 Literature Review.....	3
1.4Timeschedule.....	5
1.5 Chapters Contents.....	5

Chapter two: Physiological background.6

2.1 Introduction.....	7
2.2 Principles of Hemodialysis.....	7
2.3Types of vascular access.....	7
2.3.1 Radiocephalic fistula.....	8
2.3.2 Brachial-cubital, cephalic and basilic fistula.....	8
2.3.3Arteriovenous graft.....	8
2.4Vascular Access failure.....	9
2.5Blood components and its functions.....	9
2.5.1 Plasma.....	9
2.5.2 Red blood cells	10
2.5.3 White blood cells.....	10
2.5.4 Platelets.....	10
2.6 Hematocrite.....	11
2.6.1 Monitoring of Hematocrite (HCT).....	11
2.7 Access recirculation.....	12

2.8 Plasma calculation.....	15
------------------------------------	-----------

Chapter three: Literature Review.....16

3.1 Introduction.....	17
------------------------------	-----------

3.2flow access monitor by using saline dilution method.....	17
--	-----------

3.2.1Drawbacks.....	19
---------------------	----

3.3 flow access monitor by Using Thermodilution method.....	19
--	-----------

3.3.1 Drawbacks.....	21
----------------------	----

3.4Flow access monitoring by using extracorporeal temperature gradients.....	21
---	-----------

3.4.1 Reasons for chosen this method	22
--	----

3.5Blood sample method.....	22
------------------------------------	-----------

3.6 Automated analyzer	23
-------------------------------------	-----------

3.7 Ultrasound method.....	24
-----------------------------------	-----------

3.8 Impedance spectroscopy method	25
--	-----------

3.9LED light with multiple wave length.....	25
--	-----------

3.9.1 Reasons for chosen this method	28
--	----

Chapter four:Hardware Design.....29

4.1 Introduction.....	30
------------------------------	-----------

4.2 HD Flow Diagram.....	30
---------------------------------	-----------

4.2.1 Blood Circuit.....	31
--------------------------	----

4.2.2 Dialysate Circuit.....	31
------------------------------	----

4.3 Project Block Diagram & Circuits.....	32
--	-----------

4.3.1 Temperature sensor.....	33
-------------------------------	----

4.3.2 Sensor measurement circuit	35
--	----

4.3.3 Matching circuit	36
------------------------------	----

4.3.4Non-Inverting Operation Amplifier.....	36
---	----

4.3.5Transmitters.....	38
------------------------	----

4.3.6Constant current source for driving LEDs.....	39
--	----

4.3.7 Phototransistors.....	40
-----------------------------	----

4.3.8 High Pass Filter.....	42
-----------------------------	----

4.3.9 Low pass filter.....	43
----------------------------	----

4.4 Project Circuits.....	46
----------------------------------	-----------

Chapter five: Software Design.....49

5.1 Introduction.....	50
------------------------------	-----------

5.2Arduino Microcontroller.....	50
--	-----------

5.2.1 Power.....	51
------------------	----

5.2.2 Input and Output Programming.....	51
---	----

5.2.3 Programming.....	52
------------------------	----

5.3 Project Flowchart.....	53
-----------------------------------	-----------

Chapter six: Results and analysis.....56

6.1 Introduction.....	57
------------------------------	-----------

6.2 Study design.....	57
------------------------------	-----------

6.3 Temperature sensor.....	59
------------------------------------	-----------

6.4 Pump blood flow rate	60
---------------------------------------	-----------

6.5 Patient screen.....	60
--------------------------------	-----------

6.6 Voltmeter readings.....	61
------------------------------------	-----------

6.6.1 Voltmeter readings before reversing.....	61
---	-----------

6.6.2 Voltmeter readings after reversing.....	62
--	-----------

6.7 LCD screen.....	63
6.8 Results and analysis.....	65
6.8.1 Analysis.....	65
6.8.2 Results.....	66
6.9 Conclusion.....	70
6.10 Recommendation.....	71
